

SolarEdge Product Waiver Approval

Issue date: 10th November 2022

Dear installer,

Upon examining your waiver request, SolarEdge decided to approve it under the following conditions:

- a. This approval is limited to the use of the P750 Power Optimizer in a 2:1 connection with one of the following PV modules:
 - a. Voltec VSMD-395
 - b. Voltec VSBD-395
- b. This approval is limited to installations done in France until the end of June 2023
- c. The rest of the installation guidelines and the Power Optimizer's performance remain as stated in the SolarEdge specifications and installation documents.

SolarEdge approves that the design mentioned above for this project, though exceeding the Power Optimizer maximum input power limit (790W vs. 750W), will not void the Power Optimizer or Inverter warranty.

The site must be connected to the SolarEdge monitoring, and site IDs should be reported to waivers_support@solaredge.com within 3 weeks from installation.

Failing to report the site will void this waiver.
